23080 K EJ W507 C08-TIMKEN SFÆRISK RULLELEJE KONISK HUL TIL VIBRENDE UDRUSTNING

High quality spherical roller bearing from TIMKEN, a world leader in roller bearing technology. TIMKEN spherical roller bearings feature high class materials, innovative cage designs, enhanced surface finishes allowing better lubricant distribution and higher load ratings leading up to lower operating temperatures and longer service life. The W507 C08 version offers several enhanced properties such as P5 running accuracy and high point of eccentricity marked on both outer and inner rings and tapped lifting holes in face of the outer ring to facilitate lifting and handling.
